Precision MACHINING

GT AutomatioN Group is proud to provide its customers with 24-hour precision machining, fabrication, assembly, grinding, EDM, repair and maintenance, and emergency services.

GT is capable of furnishing high quality machining services at competitive prices. We have the equipment and personnel to perform complete machining services from prototype to production.

We'd like to make you a happy customer.

Capabilities OVERVIEW

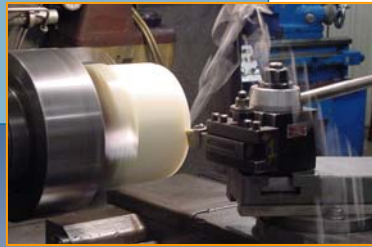

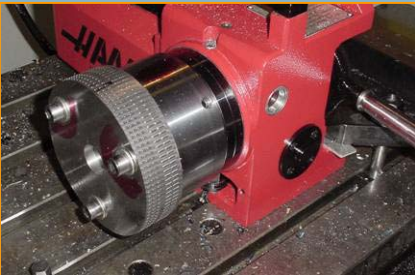

Since 1946, GT AutomatioN Group has built its reputation through providing services tailored to meet specific machining requirements of its customers.

GT Automation can provide a wide range of services related to the following:

- Design and Engineering
- Large Machining Capabilities
- Fabrication and Custom Welding
- EDM Capabilities
- General Machining
- Grinding
- Rubber Molds
- Stamping Dies
- Tools and Gauges
- Repair and Maintenance
- Emergency services
- And more

APPLICATION EXAMPLES

Detailing	Details To Print, Details From Samples, Progressive dies, Stamping dies, Reverse engineering, Rubber molds, repair parts, rebuilds, etc.
Milling	We have CNC horizontal, vertical, and boring mills with capabilities up to 90" x 86" x 70"
Grinding	We have surface, jig, internal and cylindrical grinders with the capability to grind surfaces up to 108"
Gun drilling	We can drill holes up to 1.25" in diameter by 72" in depth.
Turning	We have CNC and manual lathes, vertical and horizontal, capable of handling parts up to 84" in diameter and 13' in length.
EDM	We have CNC, wire and electrode machines with capabilities up to 14" x 20" x 12" with excellent throughput capacity.
Welding	Full welding capabilities including, mig, tig, stick welding and plasma cutting.
Other	We have presses, a paint booth, sandblasting and a host of other machines and vendor relationships that allow us to meet a large variety of needs.

If your application requires automation, controls, or programming we have highly skilled personnel to meet your needs.
